# Python/Jupyter & our mamba environments

- might need to edit the python extension settings to be able to find our environments
- for jupyter you have to set the kernel to the respective mamba environment:

```
Python: Venv Path (Not synced)
Path to folder with a list of Virtual Environments (e.g. ~/.pyenv, ~/Envs, ~/.virtualenvs).
/nfs/sw/micromamba/envs
```

- for regular python files:
